## PROFILE

Full-Stack Developer specializing in the MERN stack and Next.js, AWS cloud deployment and technical SEO. I build responsive web applications that have their own backends, deploy them on AWS and Vercel, and apply technical SEO practices to improve site structure, crawlability, page performance and search visibility.

## SELECTED PROJECTS

### StackNova Jobs

Next.js 15 · React 19 · Tailwind CSS 4 · Node.js · Express · MongoDB · JWT

A full-stack job board connecting employers with job seekers. Employers post and manage listings from a dashboard; seekers search, filter by job type and apply. JWT authentication with bcrypt-hashed passwords and role-based access.

### Real-Time Chat App

React · Vite · Tailwind CSS · Node.js · Express · MongoDB · Socket.io · JWT

Instant one-to-one messaging with live online/offline status. Messages are saved to MongoDB, users sign in with JWT, and the sidebar supports user search with auto-scroll to the latest message.

### Snippet Master

Next.js 16 · React 19 · TypeScript · Prisma · SQLite · Monaco Editor

A personal vault for code snippets: create, view, edit and delete snippets, with a built-in Monaco code editor. Built on the Next.js App Router with server actions and server-side validation.
